

Climate House Advisory Energy Monitor

Advisory session guide

Svensson Energy Monitor

For us at Svensson it is important to make sure that our products and solution are used to its fullest so that you as a grower can get the right effect of your investment. That is why we created Climate House Advisory. This document serve as a guide to explain the advisory sessions included in your Svensson Energy Monitor tool.

Session 1

1,5 hours

- After installation
- Explanation Svensson Energy Monitor
- Setting up the right parameters

Session 2

1,5 hours

- +/- 2 months after commissioning
- Analysing the monitor graphs and reports and advice in screen strategy in relation to crop growth

Session 3

1,5 hours

- +/- 4-6 months after commissioning
- Analysing the monitor graphs and reports and advice in screen strategy in relation to crop growth

Svensson Energy Monitor

Svensson Energy Monitor is a real-time monitor in LetsGrow.com that visualizes savings (and missed savings) in energy and money when using climate screens. It provides automated advice for the right screen strategy, helping growers get the most out of climate screens.
